

# Pick Up the Pieces

[Gomez](#)

Pick up the pieces and well, throw them away  
Throw them away and replace them  
Bring on the blues now and well, chase them away  
Chase them away, celebration All that I want is for you to be there when I call  
And after all I know you will be there  
You'll be there after all Bring on the band now, set them playing away  
And if they stay, well, embrace them  
Bring on the people, we can dance and well play  
Let's dance the night away, celebration All that I want is for you to be here when I fall  
And after all I know you will be here  
You'll be here after all
