

Have a Nice Day

Last Tuesday

Shake my hand, your doing fine
Shake my hand, and feed me another line
Say hello and watch me go
Say hello realize that I'll never know You're all alone....cause no ones there
You have no home...and no one cares
And yet you stand there saying I'm okay, have a nice day
Just wait I truly want to know what you think before you sleep
Just before you close your eyes, what goes through your mind Quietly you shed a tear, quietly you say you have
no fear
Say goodbye and walk away
Say goodbye you make it through another day Tell me what's wrong, I'll tell you too
Tell me what's hard, we'll make it through People come, people go, but do we truly want to know
What they think before they sleep,
just before they close their eyes, what goes through their minds
