

Dream About

Jonas

I see it's gonna rain again this morning
I see the clouds from my hotel room
Another day on the road is getting boring
Knowing that I'm not there with you
Keep the bed warm when I'm gone baby
N I'll keep my heart warm for you

Chorus

Tell me that we all need something to dream about
So far away i feel you lying right here
You give me something to dream about
When you sleep alone tho I am not home I am near

Playing with the boys again last night babe
So many in the crowd but they're not you
It's not enough to serach for fame and glory
I need to know that you're longing for me too
Drives it home with every face i see
How much it is you mean to me

Chorus

Tell me that we all need something to dream about
So far away I see you lying right here
You give me something to dream about
Tho I am not home and you sleep alone
Just keep the bed warm for me when I'm gone my baby
N I'll keep my heart warm for you
Just Just for you.....

Tell me that we all need something to dream about
So far away i feel you lying lying right here yeah
Well you give me something to dream about
Tho you sleep alone I am near
I'm still here
