

# Psychic Horns

## Mayhem

Subordination to another will  
Sophisticated subtle techniques  
Mind psyche wide opened  
Stimulated triggers  
Thought forms of malevolence and fear  
In the veins of the floating genocide  
Robot of voids by ultrasonic stimulations  
Holds down the vibrational field  
Rituals take place on grid of vortex  
points  
Terror horror and hatred created  
Worship of deconstructive negative pole  
R-complex evolves the vril-force  
Nourishment for the non-physical forms  
To contact and manifest entities of another world  
Flying through the depths of space  
Someones hand on the wheel  
From where the lizard eye  
Focuses the infinite line of alienation  
Enter the gate of eternal lights  
Appear another existence form  
The immerge bended into the abyss  
Inner world in the depths of the planet  
Where the inverted sun never set  
Illumination the enormous entities  
Hiding them from the human eyes  
Converse tubes to the surfaces and back  
Only certain chosen can enter
