

# Warning Shots

## Ash Future

They try their best just to mash up the resistance  
Warning shots and sirens from a distance  
Riot gear and barricade for an instance  
And the words from mi mouth, mi nuh response  
Hollywood sending signals of destruction  
Stereotype the ghetto youths as the bad man  
Overcome the rough times and we grow strong  
Step up in a life, now them want to shake we handWe are eternal, made of the creator  
Wont fall to the soul-less devastators  
Divide and conquer, and try to separate us  
Up to this day, them still try fi rape us
