

# You're a Star

## The Lads

I crash landed all alone  
My ship was broken down  
When I first saw you  
A constellation on your own The space between us was electric  
How you brightened up the sky You're a star  
There will never be one like you are  
You're a star  
Look at you shine, would you be mine? Rapidly I start to mend  
The broken pieces for my journey to you  
Your stellar presence draws me in I've been waiting for this moment  
Nearly time for me to fly Do you feel the same as me  
Or is this just astronomy?  
But I got this crazy notion, baby  
That maybe you would like to be with me
