

Sign Language

Vistas

Making me yours is something that I hope of
Does it hurt the side of your alibi or does it fit like a glove?
Is that something said by your boyfriend? I hope not
Just make me believe the casualties were of war not from love

If you take me home,
I'll be your cornerstone
And I will want you more than I already do

Yes I need to
So I talk with my hands
It's just like sign language
To help you, help you understand
That words were never enough for us to,
Make it easily, finding a way to help me be
Talking with my hands

Making me yours is something that we all dream of
Just gesticulate at your own rate, oh will that be enough?
Is that something said by your boyfriend? I hope not
Just make me believe the casualties were of war not from love

And you take me home
Not even looking for your telephone
Just let me want you more than I already do

Yes I need to
So I talk with my hands
It's just like sign language
To help you, help you understand
That words were never enough for us to,
Make it easily, finding a way to help me be
Talking with my hands

Talking with my-
Talking with my-
Talking with my hands

Yes I need to
So I talk with my hands

It's just like sign language
To help you, help you understand
That words were never enough for us to,
Make it easily, finding a way to help me be
Talking with my-
Talking with my-
Talking with my hands
