

# I Still Love You

[Amanda Perez](#)

Tell me why, what did I do?  
Just the other night the love of my life went away  
And I can't sleep at night, it's driving me crazy  
Why can't you see that I miss looking in your eyes?  
Why can't you see that I miss kissing you good night? I still love you, please take my hand  
Let me help you, help you to understand that  
Ain't nobody ever gonna love you like I do  
And ain't nobody ever gonna do the things  
I do for you 'cause I still love you Tell me why when I call you at home  
You say you're with your friends, don't call no more  
Why can't you see the love staring you right in your face?  
Why can't you see that I don't want no one to come and take your place? I still love you, please take my hand  
Let me help you, help you to understand that  
Ain't nobody ever gonna love you like I do  
And ain't nobody ever gonna do the things  
I do for you 'cause I still love you I still love you, please take my hand  
Let me help you, help you to understand that  
Ain't nobody ever gonna love you like I do  
And ain't nobody ever gonna do the things  
I do for you 'cause I still love you This is something that I can't understand  
Why couldn't you just be my man?  
And all the love that we've given  
I don't want it to be wasted  
Why can't you, why can't you face it? 'Cause I still love you, please take my hand  
Let me help you, help you to understand that  
Ain't nobody ever gonna love you like I do  
And ain't nobody ever gonna do the things  
I do for you 'cause I still love you I still love you, please take my hand  
Let me help you, help you to understand that  
Ain't nobody ever gonna love you like I do  
And ain't nobody ever gonna do the things  
I do for you 'cause I still love you I still love you, please take my hand  
Let me help you, help you to understand that  
Ain't nobody ever gonna love you like I do
