

Your Biggest Mistake

New Found Glory

Advisory - the following lyrics contain explicit language:

What do you think inside your head?
I wanna know
So you think that this could end up
Breaking you Your life is a time bomb set to explode
You talk out your ass and everyone knows
For once you should listen and care what I think
Or Ill be gone before you can blink Everyones told you over and over again
Youre making the biggest mistake of your life
Everyones told you, everyone youve left behind
Youre making the biggest mistake of your life Everyone knows that youre afraid of
Missing out
And I know that its hard for you to
Swallow down And the world youve created is set to explode
You lie through your teeth and everyone knows
For once you should take what Im willing to give
Or youll stay stuck in the web youre trapped in Everyones told you over and over again
Youre making the biggest mistake of your life
Everyones told you, everyone youve left behind
Youre making the biggest mistake of your life Its a chance you should take
And I know its not an easy one to make
You should trust the ones that are closest to you Everyones told you over and over again
Youre making the biggest mistake of your life
Everyones told you, everyone youve left behind
Youre making the biggest mistake of your life Your life
The biggest mistake of your life
