

Impllosionatic

Hot Hot Heat

I think it's time you take another look around if you're gonna bring a knife into a gunfight bragging how you're sick of hearing every single human being seeing as they're watching but can't see past what they're seeing

 You can keep em at bat but put that knife away

Always with the wild card you're gonna wanna play cuz you're my impllosionatic

 My implosion addict

 That a boy

 Don't rock the boat

 That a boy

 Let it implode

I think it's time you take another couple days off

 Gotta make a conversation such a face off

 I'm betting debt is threatening to make it worse

 Try to hide you're dreaming up an epitaphic verse

 You can keep em at bay but put your pills away

 Always with the wild card you always wanna play

 So much for dying before you're 30 or 27 like Jan and Jim

 Get on it

Where's your iconic all too ironic romantic tragedy recorded quadraphonic?
