

# Probable Cause

## Ekko Park

Story in time and there it is  
Beating the fault  
And there it is living afraid  
And there it is the side of the road  
And there it is Who do you call?  
And there it is, to gather along  
And there it is, to climb up wall  
And there it is, truth and the fault  
And there it is  
Pushing me outside, not looking in  
If I can barely hold on, you can never lose way  
The world around it's washed away  
Stories that you told us, you can never retrain  
The world around it's washed away  
It's washed away  
Crack in her eye, and there it is  
Why would you run?  
And there it is, to step back in time  
And there it is, probable cause  
And there it is Pushing me outside, not looking in  
See all in the outside,  
This is where we repeat it  
If I can barely hold on, you can never lose way  
The world around it's washed away  
Stories that you told us, you can never retrain  
The world around it's washed away  
It's washed away  
If I can barely hold on, you can never lose way  
The world around it's washed away  
Stories that you told us, you can never retrain  
The world around it's washed away  
It's washed away
