

# What Will the Revolution Change

## Youth Brigade

look back on ages past will it ever change we make the mistakes again and again yet the problems still remain  
so what's the solution, what is the cause things are confused and nobody knows start a revolution for those who  
try to change despise your ideals do you know where you're going can you tell me, what will the revolution  
change machine guns and blood in the street learn to have no regrets in the name of revolution anything goes  
but death is all you get and now it's you who've wiped out the few who impose their rules on all of you what  
have you changes is it a game and death is all you get to spite your intentions, you make the conventions can  
you tell me , what will the revolution change
