

Grey Harpoon

The Coral

Please don't let the light through my window
Keep the curtain shut, it brings me good luck
Please don't let the light through my window
Don't wanna see the day, I don't need it anyway Please don't let the light through my window
Don't wanna see the shop or the wet bus stop
Please don't let the light through my window
The bells ring out for doom at this Sunday afternoon Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
