

Clean Elvis

[Dan Reeder](#)

I inject your kryptonite into my brain
It improves my kung-fu and it eases the pain
During acceleration when the peddle hits the floor
This thing burns nitroglycerin and powdered c-4
And I, will always love you

I drive a modified D series Lola
It's kinda heavy but I like the feel
When I say Vietnam it sounds just like Coca Cola
I believe most anything as long as it's not real
And I, will always love you

I battle aliens from outer space
They got one eye right in the middle of their face
I grab my laser gun, I know my place
Somebody has to save the, human race
And I, will always love you

It seems hopeless, but wouldn't you know
They got a weakness and they let it show
They can't jump and they're a little bit slow
When I say World War II I mean the video
And I, help me Elvis, I, help me Elvis, I, come on now Elvis

I can't help, falling in love with you
