

# Gestation of Smegma

## Cattle Decapitation

Something awful happened to this child  
An unholly wad of smegmated gestation  
Jelly-like and squirming retarded heap  
No arms  
No legs  
No head  
Gestation of smegma  
Slithering and writhing  
an animate discharge  
Mucous covered epithelial appendages  
sliced off-to be used as lard  
Trail of mucous, plasma and saliva  
Human chunk of fat, skin and grey matter  
Gestation gone wrong  
weeping 2-week old waste of human flesh  
Smegmated. Defect. Monster.
