

First Days of Something (Delorean Remix)

Young Dreams

I couldn't stop talking
I now need a charger for my mobile phone
I want to go walking
I want to go walking in the city So's the time and what I feel is wrong
Into the room,
Sings be songs from out of stand and holds
And the lonely, times we was wrong
First days of something
What makes a year, charging my faults
I don't care anymore
First days of something
First days of something
And could we be lovers?
Will there be an answer in my mobile phone
And while you recover
I'm spending my time thinking of someone
So's the time and what I feel is wrong
Into the room,
Sings be songs from out of stand and holds
And the lonely, times we was wrong
First days of something
What makes a year, charging my faults
I don't care anymore
First days of something
First days of something
First days of something
First days of something.
