

# People Beyond the Sun

## Orgone

Brother, sister  
Philosophy can only take you so farMother, Father  
I bet you thought you were the center starYou gotta believe  
one day we will see  
you and me  
it will come to be we are the people  
beyond the sun  
living peaceful  
on the one.  
listen children  
we are only what we leave behindmother, uh father  
just a tiny bit of stardust in their mindsenergy electricity  
of you and me  
we will come to see that we are the people  
beyond the sun  
living peaceful  
on the one we are the people  
beyond the sun  
living peaceful  
on the one  
It might seem like a long way now  
but we are the people, the people  
we will find a place for each other  
and resonate without evil
