

# World Unglued

## The Growlers

So agnostic, its toxic  
You know what I mean  
Caught in a fever though she acts serene  
The static coaster on her back  
Attracted to her scream  
Thinking about her vacant dreams  
Though she rarely dreams  
Lady it ain't where we come from  
Or where we are right now  
Its where we're going to  
Your family's insane  
You never picked this town but now its all on you  
And left the world unglued  
So she's a mannequin inside of a tube  
Says people are freaks and the world is doomed  
But if you get a glimpts into her gaze  
You'll see the stars shining  
Underneath the hazeLady it ain't where we come from  
Or where we are right now  
Its where we're going to  
Your family's insane  
You never picked this town but now its all on you  
Just the let the world unglue  
Too tied uptight, far too nearsight  
Step from the glass, skip, the season passes  
Micro, macro, psycho, aggroToo tied uptight, far too nearsight  
Step from the glass, skip, the season passes  
Micro, macro, psycho, aggro  
Maybe we'll know, but for now we'll let it go
