

# Retina And The Sky

## Idiot Pilot

The golden shore of certainty  
And riding on simply  
Because there's nothing else to do  
When nothing ever gets done but I can see the day turning bright  
Up ahead, up ahead  
I can see the day turning bright  
Up ahead The pleasant odor of apathy and everlasting  
Peace of mind that comes with time  
And smashing through the windshield, I can see the day turning bright  
Up ahead, up ahead  
I can see the day turning bright  
Up ahead Could you tell me where we'll be  
When the light is taking over everything?  
Could you tell me where we'll be  
When the light is taking over everything? I can see the day turning bright  
Up ahead, up ahead  
I can see the day turning bright  
Up ahead Better than I've ever known  
Better than I've ever known  
Better than I've ever known
