Put Your Arms Around Someone

Jennette McCurdy

Every single day there's a million distractions
People come and go
Never know who they're passin'
Sounds up, sound down again and againYou can feel it in the air
You can tell something's missing
Might be a waste but, but if you listen
Our hearts are crying loud and clearSo I'll not stop right hereJust put your arms around someone
Never know whose waiting for a little love
It's not a waste of time, we got enough
So put your arms around someoneThere's a whole lot of hurt going around
If you got a smile won't you pass it down?
It's going to mean so much
So go on, go on and put your arms around someoneYou can make someone's day with a simple connection
Leave a little space so they respect you
Who knows, never know what you'll findLet your act shine, let it be contagious
Love always gonna be the remedy, the saver
Give it a chance, give it a try
It might even make you feel good insideJust put your arms around someone
Never know whose waiting for a little love
It's not a waste of time, we got enough
So put your arms around someoneThere's a whole lot of hurt going around
If you got a smile won't you pass it down?
It's going to mean so much
So go on, go on and put your arms around someoneFeel the love and don't be scared
To open upJust put your arms around someone
Never know whose waiting for a little love
It's not a waste of time, we got enough
So put your arms around someoneThere's a whole lot of hurt going around
If you got a smile won't you pass it down?
It's going to mean so much
So go on, go on and put your arms around someoneOhh
Go on, go on and put your arms around someone
