Crystal

Devorah

Fade away
All that we have dreamed of
Bergman said it all
The magic's in the fall, so true
When you see him
Tell him all, all that you don't know
All how much we've grown
So I cry but like always
I don't feel that much in here
Now I sit by your side, just to be near you
Oh Lord, please don't take him yet
Now you're gone, you're with angels
I will soon come, visit you
And talk about the time we had together
And our town is filled with tears
Don't feel bad while you're there
Life was only sad when you were here
Filled with rage and fear
And now I sit by your side, but you can't hear me
You can always count on me
Don't feel sad, you're with angels
I will soon come, visit you
And talk about the time we had together
Now our town is filled with
So I sit by your side, although you're not with me
When I comfort you, when I come to you
And like always right here by your side
Don't feel sad, you're with angels
I will soon come, visit you
And talk about the time we had together
And our town is filled with tears
