

Finding Out

Union 13

Getting started is not so hard, I put up my guard and wait
Because patience seems to pay off later Making the best of what I've got, a little becomes a lot
All the thoughts I have are all on paper Now won't you let me find out
Who I am, when you're all around
Maybe I should identify
What's gone wrong with my life, it hurts When they press and they won't let you rest
Finding out life's a test, many things to contest
There just please let me rest And when you fight to survive, let us know you're alive
And maybe deep inside, you are tuned to what's right Now won't you let me find out
Who I am, when you're all around
Maybe I should identify
What's gone wrong with my life, it hurts When they press and they won't let you rest
Finding out life's a test, many things to contest
There just please let me rest, my mind
