California Crossing

Fu Manchu

Twenty years or more
We had a plan
To build the finest street ride
In the whole damn landSome dip down for keys
Some cheetah slicks
Leather bars and the holly
Just for kicksHappenin' since the dawn of time
Big block will shut you down, off the line
In California, there is no stopping
In California, the California CrossingWe didn't know
Couldn't foresee
Cold blooded snake
Building up heatTries to fly but it's no use
Cobra's got the bird and it's loose
In California, there is no stopping
In California, the California CrossingIn between runs
Through oil and smoke
Thought to myself
Did we ever choke?Happenin' since
The dawn of time
Big block will shut you down
Off the lineTries to fly but it's no use, it's no use
There is no stopping
California, the California crossing
In California, there is no stopping
In California, the California crossing
