

Shiver

Gates

Shiver, shake at the thought of it
Buckle and break in the face of the things You'll miss
Quiver, quake like Your trembling lips
One mistake by the grace of your fingertips Can't decide if I'm done deciding
If a feeling defines me
If it's never about what I want
And it's about what I need Shiver, shatter all that You have left
Left regret be the noose tied around Your neck
Quiver, now's the only chance You'll get
Don't be swayed by what you have to say about it I've decided I'm done deciding
If a feeling defines me
If it's never about what I want
And it's about what I need So I take another step into your direction
And become the break in our boundary
And I feel a slip as I loose my grip
On our love and learn as long as I breathe You're what I need Shiver (3x)
