

Deep End

Newsboys

She's diving down
Gonna make her home now the ocean
She's done with living her life on the ground
She's sinking down
Hands above her head her
And nineteen years and now they're letting go Tomorrow will be 'round
And everyone will see no tragedy
It's like it's over but it's just begun She's going off the deep end
Breaking from the crowd
She's way over her head
I think she's gonna drown She's going off the deep end
The search is over now
She's falling into your hands
It's all or nothing
There's no guessing
She's been lost and found She's diving down
Scars on her elbows the wind blows
An old song spins around inside
How sweet the sound'
To be living and dying
Looks like it's over but it's just begun She's going off the deep end
Breaking from the crowd
She's way over her head
I think she's gonna drown She's going off the deep end
The search is over now
She's falling into your hands
It's all or nothing
There's no guessing
She's been lost and found
And I miss her To take this step of faith
Don't need to be scared
Turn worry into wonder
Dissolve the fear
She's steppin' out
And you drop the blame
As she speaks the name
Above all other names She's going off the deep end
Breaking from the crowd
She's way over her head

I think she's gonna drown
She's going off the deep end
The search is over now
She's falling into your hands
It's all or nothing
There's no guessing
She's been lost and found
She's going off the deep end
There's no guessing
She's been lost and found
She's going off the deep end
There's no guessing
She's been lost and found
She's going off the deep end
To be lost and found
Her world has turned upside down
Her soul restored with salt like rain
From all of the things that you forgave
And all the times she'd disobey
She's diving in the ocean of your grace
