

# **Trials (Live from Soiled Dove)**

**Jackopierce**

I like the way she calls me baby  
Hair pulled back to show her smile  
Coming in late she always says maybe  
We should wait a little while I was hoping maybe one day  
We could have ourselves a child  
And name him after her great grandfather  
Any thing makes her smile I know  
I've seen it before All the lessons I've learned  
All the money I've burned  
All the things that I thought were but they weren't  
All were trials that added up to her All these lovers making compromise  
Trying to make sacrifice for love  
Hoping things will only get better and better but they don't  
Only poised to see them fall I know  
I've seen it before All the lessons I've learned  
All the money I've burned  
All the things that I thought were but they weren't  
All were trials that added up to her All the lessons I've learned  
All the money I've burned  
All the things that I thought were but they weren't She emanates light  
Hits I realize  
What I do not deserve I do not deny
