Light Up

[MUTEMATH](#)

I canâ€™t believe that you would think
Iâ€™d never see that you deserve the best (deserve the best)
If youâ€™re afraid, then Iâ€™m to blame
I shouldâ€™ve never let it come to this (come to this)

Sometimes we just have to walk through the fire (the fire)
Just to see once more what has never shined brighter (shined brighter)

Don't say enough, weâ€™re not out of love
We just grew up having to find out that
Hearts go astray, sparks slip away
But I have to say, I still light up for you
For you, I still light up for you

Donâ€™t let the tears undo the years
That got us here we traveled all this way (all this way)
And no matter how we sort it out
Know Iâ€™m for sure that youâ€™re the one for me (the one for me)

Sometimes we just have to walk on the wire (the wire)
Just to understand we have never felt higher (felt higher)

Don't say enough, weâ€™re not out of love
We just grew up having to find out that
Hearts go astray, sparks slip away
But I have to say, I still light up for you
For you, I still light up for you

Nobody said it would be easy
We thought we could prove them wrong
And we know it takes more than a feeling
To carry the two of us on
But I still believe in our love
Yeah I still believe in us
I still believe in us
I still light up

Don't say enough, weâ€™re not out of love
We just grew up having to find out that
Hearts go astray, sparks slip away

But I have to say, I still light up for you
For you, I still light up for you
