

Bad Dream Baby

Springtime Carnivore

Our Heaven was
Just three stories up
There's a bad dream where I
Keep falling from the skyMy heart was open wide
You through the dynamite
It's a bad dream come true
Not leaving like I wanted toDon't even say you're turning around again
Don't try to walk back into my life
I fall for it every time, I fall for it every time
I lose my will
I turn toward you still
It's a bad dream where I
Can't raise my hand to wave goodbyeDon't even say you're turning around again
Don't try to walk back into my life
I fall for it every time, I fall for it every timeDon't even say you're turning around again
Don't try to walk back into my life
I fall for it every time, I fall for it every time
Don't even say you're turning around again
Don't try to walk back into my life
I fall for it every time, I fall for it every timeI fall for it every time, I fall for it every time
