Action & Action

The Get Up Kids

You really think that you're bigger than this
To the tune of ten thousand lisps
Who'd of thought we'd represent
When I can't take a compliment
Over exposure is the key
And any focus on me is appreciated
And it should be, no wonder now
I finally found the right formula for
You taught me how, I play the fool
Every mistake that I make
I couldn't have made without you
What's said is done and plain to see
You take it all too seriously
What better way to make an honest mistake
Than a televised hand of fate
When the world closes in on you
A decision would be overdue
Now nothing left out of hand
A stronger jaded man stands
And if the world is ending, but we toast to it
I'm stronger now, but not without
The right formula for
You taught me how, I play the fool
Every mistake that I make
I couldn't have made without you
What's said is done and plain to see
Here's all you get from me
Here's all you get from me
I'm down for whatever
What's there left to wait for
I'm down for whatever
What's there left to wait for
Wait for, I'll wait
You taught me how, I play the fool
Every mistake that I make
I couldn't have made without you
What's said is done and plain to see
Here's all you get from me
