

# My Generation

Nas

[Chorus - Joss Stone & Choir]My generation will make a change

This generation will make a change

(Yes we will)

My generation will make a change

This generation will make a change

(Do You hear me now)

My generation will make a change

This generation will make a change

(we bout to make a change)

[Damian Marley - Verse 1]Now mi love fi see the schoolas dem a graduate

A study hard and save the party for the holidays

Diplomatic with dem Diploma

And them bound fi great

Because dem nah pick up no matic and a perpetrate

And then I love the energies whe dem a generate

My Generation it so special it will make a change

Because the elders sew the seed and it a germinate

So anytime dem see the progress dem a celebrate

Because we rising up despite of the economy

And then a we a star the show like the astronomy

And how we keep on breaking through is an anomaly

Because we keep remaining true without apology

The mission ha to carry through and finish properly

Say Gambia to Guadeloupe Paris to Napoli

Say Zambia to Honolulu back to Tripoli

And everybody want a future living happily

[Chorus - Joss Stone & singers][Nas - Verse 2]Can you blame my generation, subjected gentrification,

Depicting their frustrations over ill instrumentation

Cause music is the way to convey to you what I'm facing,

Placing my life in front of your eyes for your observation

Now if you can't relate then maybe you are too complacent,

Athletes today are scared to make Muhammad Ali statements

Whats up with your motto?

Will you lead? Will you follow?

Improve your values

Education is real power

I reach em like Bono

So get rid of your self sorrow

Add some bravado  
Get wealthy likes Wells Fargo  
Its truth, that I am you  
And I am proof  
Surviving through  
We do what we gotta do  
Yo we could break the cycle let nobody lie to you  
Then maybe put our sons and our daughters in private school  
Cause there's a mission we gotta finish before we leave  
This generation is destined to do historic deeds.  
[Chorus - Joss Stone & singers][Verse 2 - Lil Wayne] Juhh if you weather that storm  
Then that rain bring sun  
Been a long time comin  
I know change gone come  
Man I gotta keep it movin to the beat of my drum  
Last night I set the future at the feet of my son  
But they thinkin that my generation gotta die young  
If we all come together then they cant divide one  
Don't worry bout it just be about it  
Got a message from god heaven too crowded  
But I say hey young world you've never looked betta  
And I heard change started with man in the mirror ughh  
This generation  
I'mma represent  
A generation led by a black president  
Now hows that for change  
Who knew that could change  
I don't even look at the flag the same hey ughhh  
So when you finish readin revelations  
Thank god for my generation  
[Chorus - Joss Stone & singers][End]Thanks to Markie G.
