

Hold Her Down

Toad The Wet Sprocket

Hold Her Down
take her arms and hold her down...
until she stops kicking
take her arms and hold her down...
until she she stops moving and they don't know her
but what the fuck
they've got nothing else they can do
and they've no reason
but still they come and i
would have a hard time facing you
this crime
the shame of what a man can do
take her arms and hold her down...
until she stops screaming
take her arms and hold her down...
until she stops breathing and they don't know her
but what the fuck
they've got nothing else they can do
and they've no reason
but still they come and i
would have a hard time facing you
this crime
the shame of what a man can do
take the night back
all they've stolen
all we took from you
