

Like a Star

[Mike Krol](#)

[Verse 1]

4.2 light years away

I was slow to begin but I'm ready to fade

I've been alone now for my whole life And I see black while you see white

In the dark, I'm burning light for you

And that way, you can follow me home [Chorus]

I'm like a star

I'm burning out fast

I try to shine

But it's never gonna last

Can't you see me just letting you down?

With all my friends, I'll make a picture

But in the morning I'll be gone [Verse 2]

I'm missing you during the days

When the morning comes, I can't stay

If you saw me now, I wouldn't grant your wish
