

# Because

## The Bird and the Bee

Because, because I'm weary of this melody  
Because, because I want to get up off my knees  
Because, because I'm tired of chasing you around  
Because, because I'm lying prostate on the ground And when I'm tired I am so very tired  
And when it's done it's like I've killed someone Because, because I'm sick of all the bones you throw  
Because, because there's nothing from the seed you sow  
Because, because I can't remember why I'm here  
Because, because it's all become so crystal clear And when I'm tired I am so very tired  
And when it's done it's like I've killed someone Because, because, because, because  
Because, because, because, because  
Because, because, because, because  
Because, because, because, because And when I'm tired I am so very tired  
And when it's done it's like I've killed someone Because, because I'm weary of this melody  
Because, because I want to get up off my knees  
Because, because I'm tired of chasing you around  
Because, because I'm lying prostate on the ground Because, because I'm sick of all the bones you throw  
Because, because there's nothing from the seed you sow  
Because, because I can't remember why I'm here  
Because, because it's all become so crystal clear Because, because, because, because  
Because, because, because, because
