Laws Of Reason

Sanctity

Within the screaming system a burning fever hides
Temperature rises in a sea of bodies in the depths the pressure boils
Uncontrollable chaos, madness in the mob
Look at the faces around you, collective conscience for allWait for the time to open the gates
Break with fury what it may createWitness the decay of order
Where is your system nowThen the noise begins to shake the very ground
Chaos in every direction, every face a blur of sound
Wild eyes of the mob unified in sight
Joined by the energy of insanityWait for the time to open the gates
Break with fury what it may createWitness the decay of order
Where is your system now
Here's to the fall of the laws of reason
Let the madness outRipping pain of freedom
Boundaries overthrownWitness the decay of order
Where is your system now
Here's to the fall of the laws of reason
Let your system downWitness the decay of order
Where is your system now
Here's to the fall of the laws of reason
Let the madness out
