All Along

Buck-O-Nine

Where is time 'cause I'm feeling much older
Well, I'm alive and living with your cold shoulder
You say those days are over
Well, I say they've just begun, I say they've just begunIt's been awhile and I got carried away
You're bored and you've had your fun
Don't say those days are over
'Cause mine have just begun, mine have just begunI've seen my little brother
Freaking out and seeing colors
Feeling green with jealousy
Seeing red and OlivelawnAll along, all along
All along, all alongIs it me or is your mind getting hollow?
In need of leading and you need to be my follow
How we were that summer
Instead you seem much older, now
Instead you treat me colder, nowWhere's my friend, I think he's running away
From all those things we've done
Wanna get you back up here
'Cause you're already gone, you're already goneHeard about the others
They're at home and being lifeless
Forgot to read a magazine
I guess my constitution's strongAll along, all alongI could be most anything if I could be the one
I could be most anything if I could be the oneAll along, all along
HeyI could be most anything if I could be the one
I could be most anything if I could be the one
I could be most anything if I could be the one
I could be most anything if I could be the oneAll along, all along
All along, all along
