It's Not Over Yet

Mendeed

At first we worked in harmony
You took the void in me
Taking me higher than I had been
Feeling alive my numbness fading
Then came the cold turning to ice
Euphoria depletes to fear
I am the on e that fell to far
You are the ghost you're my addictionIt's not over yet I can resist chasing you
I hear your call I must deny it
It's not over yet as silent wars rage in me
To take control of my existenceI am the one hat pulls the strings
I am the one that took the fall
I am the one that rises up
I am the one that casts away
Your dying grip around my neck
Trying to choke what life I have
Blazing in me despite you
Ready to take you onI don't need to drink the cup of false hope
I can rise above and return to faith - in me
