

# Night Music

## The Erotic, Sexy, Smooth Jazz, Romantic Saxophone,

Can you hear the lone night music  
Comin' in so near?  
When I hear the lone night music  
Every nightmares crumble and they disappear  
Can you hear the echoes callin'  
Speakin' in verse?  
When I hear the strange night music  
Everythin' gets stronger and I lose this curse  
Help me break the chains that hold me  
Keep me from truth  
I wanna feel the hands that raise me  
From the low down level to the highest roof  
Woh, night music  
And I can hear it now  
Night music  
I wanna catch the rock that's fallin'  
Roll it back up hill  
When I hear the strange night music  
The whole world's turnin' and I'm still standin' still  
I feel it growin' deep inside me  
Still I'm at a loss  
When I hear the strange night music  
It's a warnin' signal there's a bridge to cross  
Woh, night music  
I feel it now  
Night music  
Woh, night music  
And I can hear it now  
I feel it now  
Good news from the next world  
Tear yourself apart  
X still marks the time and place  
To cure your bitter heart  
Feel like runnin' water  
This water of the soul  
Spinnin' like a spinnin' wheel  
Way beyond control  
Spinnin' like a spinnin' wheel  
Way beyond control  
Can you hear the lone night music  
Comin' in so far?  
When I hear the lone night music  
It's a lonely planet, it's a burnin' star  
I want to swim the widest ocean  
Divin' in so deep  
When I hear the lone night music  
I can get so blue that I just can't sleep  
Sing to me old night music  
Comin' in so near  
When I hear the lone night music  
All my nightmares crumble and they disappear  
Woh, night music  
And I believe it now

Night music Woh, night music  
I can feel it now  
I can feel it now Good news from the next world  
Tear yourself apart  
X still marks the time and place  
To cure your bitter heart Feel like runnin' water  
This water of the soul  
Spinnin' like a spinnin' wheel  
Way beyond control  
Way beyond control Woh, woh, night music
