

# Miracles or Medicine

## Cauterize

Don't flinch,  
Don't move  
Don't make a sound  
Take a deep breath  
It might be a while  
'til the next time we can breathe again  
I know you're hurt  
But don't say a word  
You need to save your strength  
It's gonna be a long night waiting for the cure.[Chorus:]  
Who will find us here  
All alone my dear  
The angels or the ambulance  
Which will save us now  
All the pills we've downed  
Miracles or medicineThe cold damp air  
The glass in your hair  
The Smell of perfume mixed with gasoline  
I think I might be sick  
As the radio  
Plays a song we know  
Through a static frequency  
I hear it freely  
The blood and makeup on your face  
It's hard to see  
You're hard to see  
But you're beautiful  
And I've told you so  
Maybe not enough but you need to know  
That I meant it  
That I meant it everytime[Chorus x2]Your eyes look like glass  
As tears freeze on their lashes  
Your lips won't stop shaking as time quickly passes  
Outlines in dark red of angels where you lay  
The epitome of all beauty is dying slowly  
Right in front of meSend flashing lights  
Distress calls in the night  
Where's the heroes  
When you need them the most

Send anything  
I don't care anymore  
Where's the miracles when you're all out of hope[Chorus]
