

# Summer In The City

## Freedom Fry

I won't live up to any expectations  
What you see is what you get  
And worse yet I can't give an explanation  
For why it's gray on your side  
But from me the sun can't hide  
Somewhere in the city it's summer in the city  
Somewhere in the city it's summer in the city  
I will rise up to every day's occasion  
What you reach is what you get  
And better yet I'll give you an indication  
For why you're feeling deprived  
But with me you come alive  
Somewhere in the city it's summer in the city  
Somewhere in the city it's summer in the city  
No more raining on this lonely town  
Summer comes around when you really want it  
Immortalized, young forever now  
There's more to life than running in the circles you become  
No more raining on this lonely town  
Summer comes around when you really want it  
Immortalized, young forever now  
C'mon and spend the summer with me  
We won't give into any hesitation  
What you need is what you get  
We'll never let lack of an imagination  
Keep us locked up inside  
Even when the sun has died  
Somewhere in the city it's summer in the city  
Somewhere in the city it's summer in the city  
No more raining on this lonely town  
Summer comes around when you really want it  
Immortalized, young forever now  
There's more to life than running in the circles you become  
No more raining on this lonely town  
Summer comes around when you really want it  
Immortalized, young forever now  
C'mon and spend the summer with me
