

# Navajo

## Jens Gad

I fell in love with a little Indian girl  
And she stole my heart away  
She took me to a pow-wow way out on the plains  
And runs with bears, danced and brought the rains  
I listened to the stories all through the night  
Through the haze of that peace pipe  
The night grew long so i found a tee pee  
And you can bet I brought that squall girl with me  
Could be Cherokee, Inuit, Etowah, Navajo,  
Sioux, Creek, Apache, Seminole bravo  
Tomahawk, arrow, any way the wind blow  
It's just fine with me  
Buffalo, wolfpack, rawhide knapsack  
Arrowhead, mohawk, other tribe to attack  
Take my wife back to that land with me  
All I gotta do is take that love to the floor  
After all, I liked the way you were before
