All Time Lows

Hellogoodbye

Whether or not the weather's on my side
We could be together if I stay bright-eyed
I can feel the summer sending signs of fall
See a happy ending if I stand up tall
Whether or not this cold front is moving in
Or it's just vacation and we'll soon be friends
I know I can't avoid her, she's in the air
May as well Polaroid her with the way I stare
Tonight the stars are so bright
I've gotta get outdoors while the weather's still here
Take in the starlight before it disappears
A chance lasts a finite time in the cool July night time
So take in all you can

Whether or not our season will soon be done
Think I've got a reason to enjoy the sun
Hear the forecast ain't as bad as it seems
It should be clearing up soon if only in dreams
Tonight the stars are so bright
I've gotta get outdoors while the weather's still here
Take in the starlight before it disappears
A chance lasts a finite time in the cool July night time
So take in all you can
I've gotta get outdoors while the weather's still here
Take in the starlight before it disappears
A chance lasts a finite time in the cool July night time
So take in all you can
