Blink

Huw Williams

Dont smoke dont drink
all i did was think
fucking life life hard times
trying to become such a drama be loved
trying to amuse myself
beats and waves will take me to my grave
and when ill go there
i know that i will be alone
cus' i been spoted blooted
many many times before
ease and pleased the least for my shive
i will be flying above the hate and the love
and if you see me honey
you had better blink your eyes
strange how night blow in to one
run with me and have some fun
drup some wine to blow up mind
misses the way to inspire the time
travels comes eleven fields
i show you mine if you show me yours
walking out of this circle
step by step im learning alon
that i can conquere my demons
just need to remember my home
thers is no need to be frightened
we here are allready are dead
get us on ending vibration
danger lots only in my head
come break through with me
such wonders terrified the soul
its real no need to question

knowledge infeltrate the whole
lightning striks in the darkes places
more im learning powers
threaten we have to make choices
lizards try to tell us wich one
strange how night blow in to one
run with me and have some fun

drup some wine to blow up mind
misses the way to inspire the time
travels comes eleven fields
i show you mine if you show me yours
strange how night blow in to one
run with me and have some fun
drup some wine to blow up mind
misses the way to inspire the time
travels comes eleven fields
i show you mine if you show me yours
dont smoke dont drink
all i did was think
fucking life life hard times
trying to become such a drama be loved
trying to amuse myself
its outrage we are tachmachine
i go there and when i go there
i know that i will be alon
cus' i been spoted blooted
meanly menay times before
ease and pleased the least for my shive
i will be flying above the hate and the love
and if you see me honey
you had better blink your eyes
