# Sad and Lonely

## Lucero

So sad and lonely for being only a little girl
You whisper, "Hold me," but know he won't be the love of your world
We all made our mistakes waiting for the better days and got left behind
You came down hard like they said you would
Your sky's got no stars
You'd quit if you could get off the ground
You been down, down, down
You been down, down, down
You're walking throught the streets and you don't belong here
You know he don't love you
And now it's clear he's gone
It didn't matter what we did 'cause we knew we were kids
All we had was time
So sad and lonely wishing only you could make it right
