

Tonight

We Are Scientists

I want you to stay and I guess I could give you a line
Its always the same but it works better every time
Just dont walk away from me
Just dont walk away from me Tonight, oh, tonight
I promise to remember that making promises
Is always a mistake I end every day trying to think my way out of my line
Well, all I can say is it takes less words every time
Just dont walk away from me
Just dont walk away from me Tonight, oh, tonight
I promise to remember that making promises
Is always a mistake Oh, tonight
I promise to remember that making promises
Is always a mistake So lets down another dose
Understanding is the last thing I want
So lets down another dose
Understanding is the last thing I want So lets down another dose
Understanding is the last thing I want
So lets down another dose
Understanding is the last thing I want So lets down another dose
Understanding is the last thing I want
So lets down another dose
Understanding is the last thing I want so Oh, tonight, oh, tonight
I promise to remember that making promises
Is always a mistake
