

When We Were Young

Pop Evil

I believe this life's eternal
They now thinking last forever come on
How hope this we were children
But we were young
We were young
Yeah Say I'm gonna be your profit
Say I'm gonna be your price
Tell me when to built my shelter
Tell me when I was upside
Times gonna feel like blankets
Words gonna dropped like flies
Son's gonna burn when I wake up
The temperatures gonna rise I wanna look in your eyes
When our worlds collide
I believe this life's eternal
That nothing can last forever come on
High hopes since we were children
But we were young
We were young
Yeah Right now full speed to nowhere
It's a flat line from world to welfare
If you think I'm gonna come undone
You better run, you got another thing coming
You got another thing coming
You got another thing coming Say you're gonna be my sheppard,
But I'm gonna cross the line
Say you're gonna lead me forward,
But I'm livin' you behind
Bullets gonna cut like razors
Bones gonna chill like eyes
I wanna looking in your eyes
When I worlds collide I believe this life's eternal
That nothing can last forever come on
High hopes since we were children
But we were young
We were young
Yeah Right now full speed to nowhere
It's a flat line from world to welfare
If you think I'm gonna come undone

You better run, you got another thing coming
You got another thing coming
You got another thing coming
You got another thing coming
You got another thing coming I believe this life's eternal
That nothing can last forever come on
High hopes since we were children
But we were young
We were young
Yeah I believe this life's eternal
That nothing can last forever come on
High hopes since we were children
But we were young
We were young
Yeah Right now full speed to nowhere
It's a flat line from world to welfare
If you think I'm gonna come undone
You better run, you got another thing coming
You got another thing coming
You got another thing coming
