

Told Me So

Starflyer 59

So you set the bar
You never told me how far
What you expect is high
I didn't know so I asked you why 'Cause you say that you told me, you told me so
And you say that you told me, you told me so
Cause you say that you told me, you told me so
And you say that you told me, you told me so If I make it more
And paint the walls and wash the floors
You still expect it high
I didn't know so I asked you why
'Cause you say that you told me, you told me so
And you say that you told me, you told me so
Cause you say that you told me, you told me so
And you say that you told me, you told me so It's all small
If you make it back
It's all small
If you make it back
'Cause you say that you told me, you told me so
And you say that you told me, you told me so
Cause you say that you told me, you told me so
And you say that you told me, you told me so
