

Back into Your System

Saliva

I've been gone away, but I'm back again

Back with all my friends

I've been floatin' away, on a silver cloud

Lined with all of my wildest dreams I'm back in your system now and I've waited much too long

I'm back in your system now and I'm finally coming home I've been thinkin' of the days, back when we began

When we made our first stand

And I get taken away, on a silver cloud

Lined with all of my wildest dreams I'm back in your system now, and I've waited much too long

I'm back in your system now and I'm finally comin' home I'm back into your system

There's a way to find and there's a way to see

And there's a way to get back in to your system

There's a way to find and there's a way to see

And there's a way to get back in to your system

There's a way to find and there's a way to see

And there's a way to get back in to your system

System Am I inside? I'm back in your system now, and I've waited much too long

I'm back in your system now and I'm finally comin' home I'm back in your system now, and I've waited much too long

I'm back in your system now and I'm finally comin' home I'm back into your system

There's a way to find and there's a way to see

And there's a way to get back in to your system

There's a way to find and there's a way to see

And there's a way to get back in to your system

There's a way to find and there's a way to see

And there's a way to get back in to your system

System
