Same Changes

Sam Phillips

The camera angles and the name campaigns
The stare cuts and the latest extremes
The way we sell ourselves, the way we spend our greed
How long it takes to hear our dreams?Circle of change, the world around you
The same changes
Hold on to the voice inside you
The same changesThe borders and the flags, how far our guns can shoot
Fascist slogans and the movie of the week
Popular opinion, cars that drive you mad
What they pay assassins and a lucky streakCircle of change, the world around you
The same changes
Hold on to the voice inside you
The same changes
Hold on to your voice, hold on to your voice
(Hold on to your voice, hold on to your voice)
(Hold on to your voice, hold on to your voice)How much time is wasted, how much time is left?
What to censor and what to read?
How hot the sun burns, what does love require?
How we run from the things we need?Circle of change the world around you
The same changes
Hold on to the voice inside you
The same changesCircle of change, the world around you
The same changes
Hold on to the voice inside you
The same changesCircle of change, the world around you
The same changes
Hold on to the voice inside you
The same changes
The same changes
The same changes
