Lead Us Into the Light

Stratovarius

Hey you, take a look aroud
Can you feel the change begin?
Soon it will be too late
If you don't wake upOutside the winds are blowing
And the people are staring so cold
The look that's in their eyes
Tells me something's wrongLead us into the light
Lead us into the lightIt's so strange
We have gone so far
Still knowing what will happen
If we close our eyesIs this the hell on earth?
And the heaven is out of our sight
Open your eyes, realize
It's not too lateLead us into the light
Lead us into the light
Lead us into the light
Lead us into the lightLead us into the light
Lead us into the light
Lead us into the light
Lead us into the light
