

Oxygen

Feeder

We all ferment, a face can change
But souls stay young
We're all connected so take a journey
With someone learn to be as one Still living, sinking, falling, twisting
But I'm breathing you in
Breathing you in oxygen, oxygen We all ferment, a taste can change
From days so young
You feel rejected, just hold your head up
To the sun learn to be as one Still living, sinking, falling, we're still living, drifting
I'm breathing you in, breathing you in
Still living, sinking, feeding, twisting, I'm living
I'm breathing you in, breathing you in
Disconnecting oxygen, oxygen, oxygen
